

Mission Positive

MIOT
INSTITUTE OF
CANCER CURE

Cancer. A diagnosis that first sends patients and their families into despair.

And then panic. Panic that has them shuttle from pillar to post, seeking second opinions, trusting none and losing precious time in the process. Panic that ignores the fact that today with new treatments, cancer can be arrested and removed completely.

Without the dreaded pain and trauma.

All that is needed is a wholistic, positive and innovative approach from a Team which is determined to **fight with you, every step of the way.** With experience, expertise and the latest facilities. Either way, beating cancer is a team effort. And whether it is for yourself or your loved one, you will want the best possible team on your side.

In other words, Be Sure when you go in. Why Experiment.?

completely root out the disease. Our histopathology lab experts study every cancer at a **molecular level** and use **genetic probes** to predict what drugs would be most effective for each patient. This depth of information, available at few centres aids specialists in making a fool proof diagnosis and a definite direction for treatment.

The best of minds & ONE goal

Niche specialisation in cancer treatment is more effective than the standard combination of chemotherapy, radiation and surgery. While these form a definite component of our treatment plans, they are taken up on a case to case basis.

Our Oncologists form barrier - free **Tumour Boards** with other specialists to chart out the most effective treatment course for each patient. They take on board the concerned specialist's indepth understanding of the affected organ, general health of the patient, cosmetic & re-construction requirements etc.

They also **stage** treatments, allowing for natural regeneration of the organ, if possible. This collaborative approach has yielded excellent results for our patients at MIOT.

Giving patients a Headstart

We give patients the **most effective treatment** by incorporating the latest technologies, techniques, drugs and protocols into the treatment process on an ongoing basis. A recent inclusion is **HIPEC**, the game changer in advanced or complex **abdominal cancer treatments**, adopted by leading global centres.

The MIOT Institute for Cancer Cure (MIOT) is a Centre of Excellence that offers patients across age groups, **complete treatment from diagnosis to cure, under one roof** - in an environment that is positive and respects their dignity. Our cutting edge treatments are customised for definite results since cancer affects each of us differently.

Cancer cure is NOT a shot in the dark at MIOT

The advanced imaging facilities and NABH accredited Laboratory are equipped to diagnose and stage all types of cancer, quickly and accurately. Very often our powerful imaging systems pick up malignancies at early stages that allow us to

Priority on Post life dignity

Our surgeons strive to return patients to **near-normal lives**, post surgery. They take utmost care to **preserve** as much of the organ as possible during surgery. They are supported by Reconstruction surgeons who work alongside to minimise any disfigurement that may occur. They also adopt pre-operative treatments through Interventional

procedures to shrink tumours so that they can be removed through minimally invasive means. This saves the organ, while leaving behind minute scars.

Our Focus: Keeping patients Positive

Highly trained and compassionate nursing teams, nutritionists and counsellors work tirelessly to keep our patients pain-free and positive. At MIOT the unpleasant side effects of radiotherapy & chemotherapy are minimised with the use of state-of-the-art machines, latest pre-medications, drug delivery devices and expert fine tuning of dosages & schedules. This allows for completion of treatment as planned by specialists, giving patients the **best chance** for a cure.

At MICC we know that cancer is a battle that has to be fought **everyday** on the ground and in the mind.

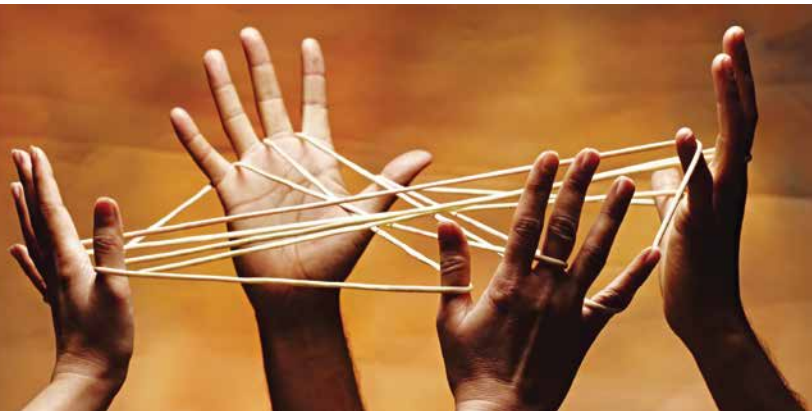

*One that we will fight with you,
every step of the way. All you
have to do is stay positive.*

MIOT International

Collaborative Care.

MIOT'S culture of healing

We treat the disease, not just the symptoms. With our focus on ensuring good outcomes we start with getting to the root cause of the disease. No treatment begins at MIOT without an **accurate diagnosis**, further to which we use the latest treatments to correct it completely. This ensures an accurate and customised healing process so that the problem does not recur.

Backed by a World Class Organisation

The MIOT Institute of Cancer Cure is part of **MIOT International**, founded 17 years ago. It is a 1000 bed, tertiary care and Level 1 trauma centre, offering medical care across 63 specialities. We offer care to patients from over 129 countries through the practice of evidence-based medicine and stringent infection control that matches international standards.

We keep Windows Open

We are one of the few centres in the country today to constantly **integrate** the **latest** treatment modalities and facilities into ongoing treatments for every speciality. This minimizes or replaces invasive procedures wherever possible, reduces medication and keeps patients pain free and comfortable. They heal faster, have shorter hospital stays and better long term results.

One-stop care

You can access all medical services across specialities without leaving the MIOT campus - from doctor's consultations, to advanced scans & lab tests, sophisticated surgery and rehabilitation. This reduces treatment & recovery time and total costs.

We also offer a range of comprehensive **Master Health plans** for Corporates and individuals, customised to life styles.

We are there, when you need care

Expert, timely attention to patients makes all the difference. Our team of handpicked, world-class specialists practice full-time and exclusively at MIOT. Armed with latest updates they discuss cases with other specialists on campus. They chart integrated and innovative treatment plans which are executed and monitored by dedicated

care teams. *This unique collaborative approach to care has enabled us to achieve outstanding outcomes, even in cases that are turned away elsewhere.*

Compassionate Care

Medical care is not all left brain led. Patients and caregivers are soothed and encouraged by the positive and compassionate environment that we strive to maintain across the spacious, green MIOT campus.

No compromises on Patient safety

Infection is today one of the biggest threats to a patient's safe recovery in hospitals. With an infection rate of **less than 0.02%**, MIOT international is today the Safest Hospital in India.

This has been made possible through a combination of sophisticated infrastructure and stringent protocols that starts at the MIOT gates!

Priority Care

We understand that there are many demands on your time. Therefore, all our processes have been streamlined, with quiet attention to detail, to give you a seamless, comfortable experience. *From the moment you enter our care, your safe and quick recovery is our only priority. Nothing else matters.*

Treatments & Procedures

SURGICAL ONCOLOGY

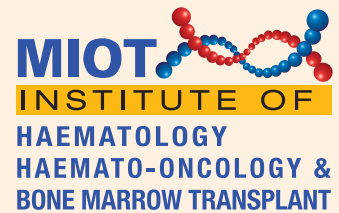

- Head and Neck Tumours - mouth, throat, voice box, salivary gland and thyroid cancers
- Chest Cancers - oesophageal (food pipe) and lung cancers
- Gastrointestinal Cancers - stomach, large and small bowel, liver, gall bladder, pancreatic & colorectal cancers
- Genitourinary Tumours - kidney, adrenal and bladder cancers
