

MIOT
REHAB
CENTRE

1ST OF ITS KIND IN SOUTH INDIA

MOBILITY IS LIFE

MIOT
REHAB
CENTRE

1ST OF ITS KIND IN SOUTH INDIA

**PROVIDING COMPLETE REHABILITATION
FOR BOTH BODY AND MIND**

**RESPIRATORY | NEUROLOGICAL | ORTHOPAEDICS | CARDIAC
VASCULAR | DIGESTIVE | MENTAL WELL-BEING**

The way we look at life, and health especially, has changed with the COVID-19 pandemic. This testing time taught us the importance and value of health and how we should approach it. It has only increased the value we have for our life and our loved ones.

As always, MIOT took the lead at the onset of the pandemic in providing COVID care. We had over 500 dedicated beds as early as March 2020. In a very short span of time over 12000 patients were treated and discharged with complete recovery from COVID-19. And this provided our greatest learning and the foundation of MIOT's next pioneering move.

With COVID, while it does seem that people recover and get back to a normal life, the aftermath of its effects on the body could not be assessed as they were recovering. But when they came back for review, we identified that most of the patients still suffered from a range of breathing problems due to reduced lung function to causing permanent lung scarring called Pulmonary Fibrosis. COVID's impact was not just on the lungs but also neuro problems like stroke, bleeding & clotting disorders and even psychological disorders.

THE PANDEMIC AFTERMATH

Observing the increasing effects on the body after a patient has recovered, it became very evident that cure and care did not end with disease recovery. It had to go beyond hospital treatment and procedure, where a complete analysis of the patient's condition is undertaken and post recovery care must be provided. Only then can it be assured that a patient can return to their normal life and live with ease. This applies not only to COVID-19, but all ailments and diseases.

This inspired MIOT to think of a centre dedicated to the whole body recovery of a patient. And thus came to life **“MIOT REHAB CENTRE”**, a complete post hospital recovery and rehabilitation centre- **1st of its kind in SOUTH INDIA.**

PIONEERING AGAIN

**A 2ND CHANCE
TO AN
INDEPENDENT LIFE**

MIOT REHAB CENTRE is a holistic rehabilitation centre, South India's first and only centre to concentrate on the complete post hospital recovery and rehabilitation of a patient. Here a special set of programs are curated and designed to give patients a second chance to live a near independent life.

MIOT REHAB CENTRE provides a complete range of physical medicine and rehabilitation services as an integral part of the healthcare practice of the hospital. It combines the various aspects of neurology, orthopaedics, respiratory, cardiac, digestive as well as mental well-being - All under one roof.

REHAB THERAPY AT MIOT REHAB CENTRE

The 666 concept of rehabilitation consists of physician supervised multidisciplinary rehab care of active therapy in various facets of physical and mental practices for 6 hours a day, 6 days a week and 6 weeks.

MIOT Rehab Centre is manned by a dedicated and experienced multidisciplinary team comprising of Neurologist, Physician in-charge, Neuro-physiotherapists, Neuro-modulation therapist, Occupational therapist, Respiratory therapist, Psychiatrist, Psychologist, Speech language pathologist, Deglutologist (Swallow specialist), Dietician and Nurse.

A PATIENT FRIENDLY CENTRE

The centre functions across an exclusive 3 floor RETREAT Block with dedicated in-patient beds. Patient and their loved one could stay there and treatment provided would be holistic-for the mind as well as the body, to return them to a happy fulfilling life.
